

CL Series: Collaborative Robots

Kawasaki will release the 'CL series' of 6-axis collaborative robots in addition to the conventional human-coexistence dual-arm SCARA robot 'duAro' through a partnership with Neura Robotics. In addition to duAro, the CL series is a new lineup.

In addition to duAro, the CL series is a new lineup.

the four models of the CL Series offer the perfect solution for every scenario

CL103N

Payload : 3kg
Reach : 590mm

CL105N

Payload : 5kg
Reach : 800mm

CL108N

Payload : 8kg
Reach : 1300mm

CL110N

Payload : 10kg
Reach : 1000mm

Features of the CL series collaborative robot

Operation speed and accuracy

The CL Series brings together industry-leading repeatability of ± 0.02 mm for all models.

Well Protected

Thanks to its IP66 rating, the CL Series can be used in all kinds of harsh environments that may not be suitable for other collaborative robots

Degree of safety

Thanks to its proprietary safety architecture and many features, it allow the CL Series Cobots to operate alongside human workers.
