

Logistics Automation Solutions with Kawasaki Robotics

Depalletizing from roll box pallets

Industry's fastest depalletizing solution now supports roll box pallets

Depalletizing up to 650 boxes an hour from roll box pallets!

MAX650BOX/1h

3D Al vision for high-speed and high-accuracy recognition of consolidated boxes!

Kawasaki's Al learning data

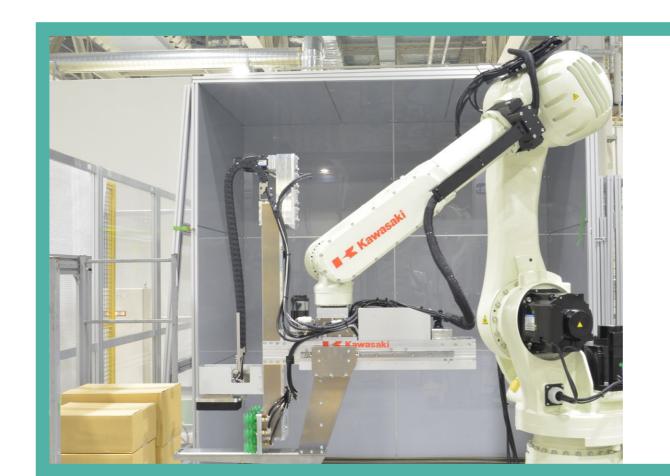

Dedicated software

Robot teaching requires only a few points, with no prior workpiece information registration needed

The system can be set up in one day!

Loading onto 6-wheel carts

Realizes conventionally-difficult loading onto 6-wheel carts

Loading up to 550 boxes an hour onto 6-wheel carts!

MAX550BOX/1h

Kawasaki's unique loading logic for optimal loading

Vambo's hand is diverted for stable load transfer

- Structure that supports loads from below, which has proven results in devanning robot
- Slim shape for transferring small loads
- Fine position control of the hand as part of a robot
