

Kawasaki Robotics e-News is an electronic bimonthly newsletter that provides our customers with useful information on robotics.

duAro and Pepper Collaborate

Kawasaki's dual-arm SCARA robot, **duAro** with **Pepper** from Softbank to create new markets.

With its dual arm, duAro is good at performing human tasks, while Pepper is good at communicating with people. The collaboration of these two robots makes a much broader range of tasks possible. Pepper can monitor duAro around the clock in factories or shops without humans attending. Pepper can also give instructions to duAro through a communication line.

(Pepper and duAro)

We are showing duAro and Pepper working together at Kawasaki **Robostage** in Odaiba, Tokyo. Please come and see this exciting demonstration.

CeBIT 2017 Exhibition

CeBIT, one of world's largest computer exhibitions, will be held from 20th to 24th March in Hannover, Germany. Japan is the official partner country this year, and JETRO (Japan External Trade Organization) will set up the Japan Pavilion.

Kawasaki will take part in the exhibition and showcase our newest technologies including the dual-arm SCARA robot, **duAro**, new F-controller and many more.

Please visit Kawasaki booth at D04(11) of the Japan Pavilion.
