

Kawasaki Robotics e-News is an electronic bimonthly newsletter that provides our customers with useful information on robotics.

Kawasaki 50 years in Robotics

Kawasaki started robot business 50 years ago. We are proud that we have been offering state-of-the-art robots in every decade for half a century, and that we contributed to the development of the industry in Japan and the world.

We would like to express sincere gratitude for customers' supports until now. For the next half a century, we will challenge new sectors such as medical and pharmaceutical industries to satisfy the needs of society in addition to the present business.

The photos below are some of the epoch-making robots Kawasaki developed.

First industrial robot in Japan (1969)

Clean robot for wafer handling (2003)

General purpose handling robot (2013)

Dual-arm SCARA robot, **duAro** (2015)

Exhibitions

Kawasaki will take part in the following 3 exhibitions at Tokyo Big Sight in June, and showcase many robots and latest technologies:

- JPCA (Electronics Packaging & Circuits) : June 7-9 @East Hall 4, 4A-24
- FOOMA (Food Machinery & Technology) : June 13-16 @East Hall 7, 7A-08
- DMS (Designing & Manufacturing Solution): June 21-23 @East hall 2, 29-30

Please visit Kawasaki booth. Our experts will be there to talk about your problems and automation solutions.

[Editor's postscript]

This bi-monthly newsletter **e-News** launched in 2009 and this edition is the **50th issue**. Thank you for your reading. We will continue to publish interesting news in the future, too.
